(54) CHARACTER OUTPUT SYSTEM

(57)Abstract:

PURPOSE: To make it possible to display and print by extended characters, user definition characters, and character data to all clients by converting character data matching output data attributes into character pattern data, and making other character data into output data and sending them, and performing display and printing based upon the output data by the clients.

CONSTITUTION: A server 1 is provided with an output data generating means 11 which converts the character data, taken out of a character pattern data storage file 12, into the output data when the character data to be sent to a client 2 match the output data attributes 25 and makes other character data into output data, and the client 2 is provided with an output processing means 12 which outputs characters on the basis of the output data sent from the server 1.

LEGAL STATUS

[Date of request for examination] 20.12.1999

[Date of sending the examiner's decision of rejection] 29.05.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
